APM subscription

New Relic APM gives you grouped view for quick diagnosis of domain-level problems. Drill down into specific requests to see performance metrics by response time, throughput and data transfer size.

PURCHASE OPTIONS

1. Select pricing model

Cloud-based

Cloud-based: Ideal when running dynamic computing environments in the cloud.
Self-hosted: Ideal when running static environments consisting of hosts managed in your own data center.

2. Select level

Lite

See the features chart for level comparisons.

3. Select commitment

Select one

Annual: Best price option (annual contract at a discounted rate).
Monthly: Flexbile option (monthly contract at the retail rate).

4. Enter number of Compute Units

Example: 5000

Compute Units: (# of CPU Cores + GB of RAM) x time used. Increments of 500
Pro has a minimum of 5500CU
